Jumbled Words

H by matfah

Problem	Submissions	Discussions

Bailey, the Beluga whale, has now developed a reading problem! When reading a message, every pair of letter in a word is switched around. For the message "I know you are talking about me Destiny", he would actually read it as "I nkwo oyu rae atklnig bauot em eDtsniy". Bailey realizes that if the message is scrambled ahead of time, then his brain will read the message correctly! Your job is to write a program that takes a normal message and switches every pair of letter within each word.

Input Format

One line of input containing all the words in the message, separated by spaces.

Constraints

There will only be alphabetic characters and spaces in the message. The message will be between 1 and 100,000 characters in the message.

Output Format

The same message with pairs of letters reversed

Sample Input 0

```
I know you are talking about me Destiny
```

Sample Output 0

```
I nkwo oyu rae atklnig bauot em eDtsniy
```

Sample Input 1

```
My life is a rainbow
```

Sample Output 1

```
yM ilef si a arniobw
```
